## Message to Shareholders

The Corporation achieved its distribution objectives for both classes of shares during the 6 month period while also increasing the net asset value by \$0.88 per unit to \$25.44 (after all distributions paid) as at May 31, 2005.

As at May 31, 2005 the Corporation's portfolio consisted of the 15 financial services companies with the weighting of each holding in the range of 4 to 10% of the market value of the portfolio. The dividend income in the portfolio continues to be supplemented by a limited covered call writing program which provides additional income to the portfolio while also providing some downside protection to the portfolio.

Financial services stocks continue to benefit in this low interest rate environment and have provided continued strong growth in earnings while consistently increasing dividends to shareholders. The continued prospects of merger and acquisition activity should also prove beneficial to the portfolio holdings.

We would like to thank investors for their support and look forward to achieving the objectives of the Corporation.
